Title:

Comments: I am writing you today in regards to the GMUG Forest Plan Revision. I hope you will sincerely consider the comments and work put in by both the Crested Butte Mountain Bike Association and the Gunnison Public Lands Initiative. As a former board member of CBMBA, and serving on the planning committee for the GPLI for 2 years, I can tell you both these organizations have done their home work. Our public lands demand conservation and appropriate recreation. I believe both these organizations share those beliefs. The GPLI is an organization of many different interests in our community, coming together as one voice to help guide this process. CBMBA has been involved with the direction of recreation in our area for over 30 years. Please make sure our access to public lands for recreation, sustainability of wildlife, and a healthy ecosystem are protected for decades to come. Thank you sincerely, John Chandler
