Title:

Comments: I live on the south side of Grand Mesa, It is where I worked in high school cleaning trails and painting picnic tables and still continue to fish,hunt,camp,atv,snowmobile, and spend time with friends and family on Grand Mesa. It provides Domestic And irrigation water and the firewood I heat my house with and many hours of enjoying the outdoors. As a local I believe the logging,cattle grazing and other activities that the Forest Service has going on up there are beneficial and healthy to the forest as they have been for the last 125 years. If trails are to be closed please let me know in advance so I can get on them one more time. MLB
