Comments: I have strong feelings on this issue. Granite Basin should remain a Wilderness Area! I support the Forest Service 2007 Wilderness recommendation for Granite Basin. I want wilderness areas (and this is the last one in Gunnison County!) to remain untouched by anything other than primitive forms of recreation such as hiking, cross country skiing, horseback riding and trail running so that future generations can enjoy the beauty and quiet of nature without traveling far from civilization. Gunnison County is incredibly beautiful and this wonderful area needs to be protected! There are plenty of areas in Gunnison County for other forms of recreation. Please consider how special this area is!
