Comments: I'm in support of the GPLI working group and CBMBA proposals for an SMA in the Granite Basin area. With CB South being the biggest population center in the Upper Valley, I believe a progressive means to manage the Granite Basin area is in order. The recreation concerns addressed by the SMA along with the same resource protections as Wilderness is a win-win for the existing uses and the best protections for the future of this area. By changing the whole area to wilderness, you will be taking away the access for CB South residents to bike their back yard trails. Biking brings huge economic and health benefits to the valley, don't take away the biking!
