Comments: Try opening up more motorized trails, especially single track dirt bike trails. There's definitely not enough of those type of trails in that area, especially on the Uncompaghre Plateau. The season for motorized use is too limited, especially in low snow years, like this year. Get rid of the dates and open it when it's ready to go. NO MORE WILDERNESS AREAS!!! There is enough of that around this area. The bunny huggers have plenty of other places to go if they don't want to hear a motor, other than the one in their Subaru.
