Comments: To whom it may concern,

I am writing you to encourage any land management planning to incorporate all recreational user types. I support already established Wilderness Area's however I do NOT support the establishment of new Wilderness Areas in the Gunnison National Forest simply because they do not allow for all users to use the land. Our public lands should remain open to all user types (to use the land responsibly). I am specifically concerned about the proposed Wilderness Area near the Cement Creek Drainage just south of Crested Butte. I really enjoy this area on my mountain bike (and hiking / dog walking), as our towns become more crowded and popular areas farther away are critical to escape into the wild.

Please take all users types into consideration. Thank you!
