Title:

Comments: I'm in support of the Gunnison Public Lands Initiative and CBMBA proposals for a Special Management Area in the Granite Basin zone. The recreation concerns addressed by the SMA along with the same resource protections as Wilderness is a win-win for the existing uses and the best protections for the future of this area. By changing the whole area to wilderness, you will be taking away the access to the very group who has put in countless volunteer hours to take care of these lands, CBMBA.
