Comments: I would just like to say that I support mountain biking - it's a great economic driver and an amazing way to enjoy the great outdoors. I would, however, like to see more restrictions on motorized travel on the trails, particularly in the high alpine areas surrounding Crested Butte. In the 30 years I have lived here, I have watched an incredible amount of trail degradation due to motor bikes. I understand the need for multiple use to a degree, but the delicate, high alpine environment just can't withstand that kind of abuse. With the increased popularity of dirt bikes that we are currently experiencing, it's only going to get worse. Keep the trails from becoming ditches!
