Comments: Please accept these comments related to Forest Plan Revision 51806. I am specifically in favor of the establishment of the proposed Granite Basin/Cement Mountain Wilderness. This in line with your previous Forest Service recommendations of 2007, but also establishes a Wilderness Area close to CB South which lacks current immediate access to a Wilderness Area, Thus, it is close to a populated area lacking in immediate access to such preserved lands.. I have hiked and hunted within the proposed boundaries and have personally experienced the peace and solitude of this beautiful area. It would be a shame and travesty for this region to be spoiled and not preserved for future generations. Additionally, I have noticed with concern and discuss at the damage to the trails, tranquility and peacefulness of the portions of the Cement Creek drainage from dirt bikes. Please establish regulations to limit such activities..
