Title:

Comments: We definitely do not want any more wilderness land....slowly all of the public land, roads and trails are being taken away from us...with more and more people moving into the state, we could use more, not more taken away from us. If anything I would like to see a law in place where you have to have some sort of toilet that contains your waste instead of just on the ground.

Maybe a few more campgrounds, but no land or roads taken away!!!!
