Comments: Re Granite Basin

I am a young adult from upstate New York who has been living in Crested Butte since November. I love the outdoors and recreating in them but there are more than enough places to mountain bike out here. There is no reason to disrupt and destroy the natural ecosystem of this area just to allow for humans to continue to rape this beautiful landscape. It is an outrage and utterly disgusting that it is even a possibility in peoples minds to change this area to suit their outdoor ideals. The earth does not belong to us, we belong to the earth and we must treat it with respect.
