Title:

Comments: I very much support a wilderness designation for the proposed area in Granite Basin. The opportunity that is currently before us to keep one of the last remaining natural areas in our county natural is something that cannot be passed up. Most of this county has already adapted to the desires of outdoor sports enthusiasts with ski resorts, mountain biking trails, dirt biking trails and hiking trails. With all of these current options for outdoor enthusiasts the need to keep the some of this area the way it has been and will be for millions of years is more important than ever. With the amount of outdoor recreation areas it is more important than ever to keep a slice of our gorgeous area preserved from the effect of mankind.
