Comments: SkiCo should disclose publicly where it will get water for snowmaking and its water rights. The public needs to know how the snowmaking fits in with the fact that Aspen has no reserve water storage and, we face drought conditions. Also, SkiCo creates substantial air pollution and nuisances over in Snowmass by repeat open burning of cleared wood and brush on US Forest Service lands. This is counter to SkiCo claims that it cares about reducing carbon emissions and global warming to "save the snowpacks". SkiCo should be required to chip and recycle or haul away all cut wood and brush and no open burning allowed.
