Title:

Comments: I am a young professional in the Gunnison Valley and an avid mountain biker. Eucher gulch is a trail that has become obsolete in the mountain bike community. This land would be better used as a wilderness area so generations in the future can benefit from solitude and peace associated with a wilderness area. There are more than enough trails in the Gunnison Valley and I believe this land would be better suited as a wilderness area. Also, the animals and ecosystem would benefit from less traffic in the area.
