Comments: As a Beaver Creek homeowner I favor the proposed McCoy Park plan. I was concerned about the loss of Nordic terrain, but see that the plan handles this well. The plan also expands beginner/intermediate terrain in an area that is free from higher speed cross traffic.

I also see that the plan includes glading. I emphatically favor expansion of glading throughout Beaver Creek in forested areas between existing runs as has been done in Bachelor Gulch and on the Strawberry Park lift. This can dramatically increase top rate skiable acreage without any increase in lift infrastructure while enhancing the health and fire survivability of the forest.
