RE: Input re: ESHC Project

Just this morning I learned of your proposed project to improve wildlife habitat in the Manchester area of the VT Green Mountain Forest. I enthusiastically support your goals and proposed project activities.

I have admired the work of RGS in the Steam Mill Brook area WMU and have seen what responsible stewardship of our public lands can yield.

I am retired and have been doing habitat work on my small scale 10-acre plot here in Danville. Your proposal is admirable and long overdue.

I wish you all success.

Wayne Majuri Sr.
