Title:

Comments: I'd like to comment on and have questions about the Robinson Integrated Research Project.

This comment concerns the Diverse Forest Use area surrounded by the Joseph Battell Wilderness Area along the Bingo Road in Rochester.

The project states under Diverse Forest Use that "Public use is managed to provide a full range of recreation opportunities, from motorized and non-motorized trails to dispersed campsites and developed campsites."

Question: Are there plans for motorized trails in the Bingo Brook area?

Comment: On the map for Bingo Road to Thresher Road, the Pine Gap Road goes directly through the private property of Marty Maher/Kristin Cassella. I believe this is incorrect as I was on the site visit with the select board of Rochester when the location of the Pine Gap Road was in question. The original Pine Gap Road does not go directly through the property. It did not even abut the property. I'm sure this is an oversight, but please; needs correcting.

In general, I understand the project scope and objectives and am hopeful about the outcome.

Thank you,

Linda Leehy
