Comments: Individual comment for Wayne revision plan

To whom it may concern,

I'm sure that I do not stand alone in asking that motorized recreation in Wayne National Forest be a lasting form of recreation in the area. I would like to add that I support allowing access to the trail system to street legal 4x4's such as Jeep's and the like. There exists a plethora of off-road 4x4 clubs in the state of Ohio, that would love to keep our money in the state, and out of private off-road parks that allow alcohol. I understand that erosion maybe an issue, but I find it hard to believe that a street legal DOT tire is more destructive than that of a mud tire that are used on ATV's and SXS's. Thank you for reading.

Very respectfully,

Tyler Biliter
