Comments: Hello Brett,

The information arrived here this AM as a member of the Grouse Society, etc.

When said and done the forested landscape would have what the percentages of seedling-sapling, pole timber, small, medium and large saw timber for example 20, 10, 30, 30 10%.

Aside from the summary provided I'd actually like to review the forest mgt. plan and prescriptions, if available.

Thanks,

John Zylstra
