Comments: To Whom it May Concern:

The following are scoping comments for the Schwartz and Leff Mineral Withdrawal #52610:

- 1) Please describe the full process in relation to active claim ownership for mineral withdrawal, so that current claim owners understand the process for full of withdrawal and how they are to be engaged in this process.
- 2) Please consider permanently retiring mineral rights as an alternative proposed action, rather than just the currently proposed 20-year withdrawal for mineral claims. Since the historic resources are of such high quality, it is important to consider protecting them from future mineral claims in perpetuity.

Sincerely, Melissa Van Scoyoc
