First name: Rod

Last name: Leehy

Organization:

Title:

Comments: (1) It seems the Bike Trail connection to Chittenden is inevitable. I assume the USFS will have some control over events and group rides. Please restrict any large events in the April thru June period as that is the 'Sensitive' time for the animals birthing and raising the fragile young ones.

(2) A Public meeting is really needed after the July 5th Deadline to clear up all the confusion - speculations - fear - hostility toward the new 'Parking' areas. I'm not sure everyone is reading the map sequences correctly (Pre-Scope - Scope - Final Analysis). A hornets nest is buzzing. You really need to be very careful with this.

(3) Managed Trail really needs to be defined. By whom - to what standard -

(4) Not against Passive Recreation. Have seen good intentions go South before.

THis is a VERY SPECIAL FOREST and once it's degraded it's a long road back.

Need a really robust implementation plan.
