Comments: Reject Ruby Mountains Oil and Gas Leasing

May 24, 2018

Jenna Padilla, U.S. Forest Service

Dear U.S. Forest Service,

Don't allow the U.S. Bureau of Land Management's request to open up the Ruby Mountains of the Humboldt-Toiyabe National Forest to oil and gas leasing. Our aquifers for fresh water must never become polluted by fracking.

The Forest Service has absolute discretion to withhold its consent to federal oil and gas leasing beneath National Forest System lands. The agency is under no obligation to allow any leasing.

Given the importance of the Ruby Mountains for fish and wildlife, for outdoor recreation, and for our American heritage of public lands, leasing in the Ruby Mountains is a terrible idea.

The fact that the Rubies are the source of water for the nearby Ruby Lake National Wildlife Refuge raises serious concerns that any future oil and gas development will pose unacceptable risks to surface and groundwater.

There is no need to lease the Ruby Mountains. Right now, there is barely any oil and gas production in the State of Nevada and all leasing appears to be completely speculative. I urge the Forest Service not to allow our public lands to be used to fuel industry speculation. These are PUBLIC lands and private industry has no business being allowed to use them for private profits

Please, reject any and all oil and gas leasing in the Ruby Mountains of the Humboldt-Toiyabe National Forest.

Thank you.

Sincerely,

Mrs. Holly Cohen
