Title:

Comments: I strongly object to the plan to relocate goats and kill the ones that escape. It just does not make good sense. It is a poor decision for the now established Olympic species and use of funds. Yes I know one person was killed because he was a friend of ours and it was an unfortunate accident. But this deliberate move in retaliation is not the right response.

These animals must be left alone. So called good intentions by some have not proven historically to be the right ones. These programs keep jobs but are disruptive to nature and animals existance.

I was a Clallam County Animal Control Officer from 2000-2003 and prior to that Animal Control for Thurston County and prior to that Animal Control for 100 square miles in Copperas Cove Texas. Plus a volunteer Animal Control in Brandenburg Kentucky. I say NO to your plan.
