Title:

Comments: I am Kirk Chandler and I am one of the Washington county commissioners. I am opposed to setting a side more land and rivers because it always makes multiple use of the land harder and restricts who can use the areas. I think the forest service should focus on providing more public use and easier access to public lands instead of always taking it away. We have people in our county complain to use that laces they used to go are off limits now, how is that public. Thanks. Commissioner Chandler 208 550 2477
