Comments: Dear sirs,

Please continue your protections for ALL 708 miles of free-flowing streams contained within the 69 rivers and creeks in the Salmon-Challis National Forest. It would be a shame to lose these national treasures.

We NEED these pristine waters more than ever. The entire eco system depends on them as do all of us down stream. There is truly NO NEED, other than commercial GREED to open up these LAST PLACES left in the lower 48 states. The planet is literally burning down and we are swimming in energy thats killing us.. Please leave these areas alone. We are begging you. Please protect this incredible area.

Thank you for doing whatever you can to protect these superb watersheds and sublime natural resources.
