Comments: As an allottee of the upriver property (Allot # Sac 2476) boarding the Schwartz site, I am in complete support of the mineral withdrawal project #52610. The historic and continued degradation and destruction of the Salmon River via mining has been a longstanding problem affecting the natural beauty, habitat and health of the river. My two recommendations would be to make the withdrawal process permanent and also to expand the project to include all possible lands within the Salmon River watershed.
