Comments:

If the recreational sections of the plan include provisions regarding ATV trails or usage within the National Forest, I have a few concerns. I have hunted and used the trails off the Denali Hwy. for over 40 years and with a basic ATV for the past 10 years or so. These trails are being systematically destroyed by ever larger and heavier ATV's. I realize BLM lands and Nat'l Forest lands have very different purposes and guidelines. But if weights, sizes, and times of year for ATV use are not limited with some severity, the trails will be destroyed by ever heavier machines, and the destruction will happen very quickly.
