First name: Geraldine

Last name: Smith

Organization: Southern Plains Land Trust

Title:

Comments: As a concerned US citizen, I value all wildlife, especially wildlife on public lands, which should be protected. Oil and gas activities must be prohibited or curtailed. Many plant and animal species have already disappeared, and our world will never be the same.

In the future, people will wonder why we did not value life, and why we let the wonderful and varied life we were given on Earth be destroyed by greed, but there will be no going back then.

Please do not allow this to happen again. Please protect the colonies and breeding grounds of prairie dogs and all other native species of these areas. Thank you.
