Comments: I believe that any projects east of Chair 2 should be eliminated. This is prime hiking territory, and as there is very limited hiking territory in Lee Canyon, these areas need to be withheld to only hiking.

You continue to fail to show the Upper Bristlecone Trail on all your maps. Is that an unlawful attempt to reduce negative comments from hikers?

Your attempt to unlawfully disregard the legally required protection of the blue butterfly is a disgraceful attempt to circumvent the environmental protection of Lee Canyon.

If you really want to cover parking needs at the ski resort during the ski season, you should strongly consider a shuttle bus system from the parking area at 95 and Lee Canyon Road up to the ski resort. This would prevent congestion at the ski resort, eliminate a lot of accidents on Lee Canyon Road, and cut down on vehicle emissions in Southern Nevada where the smog problem is bad, and getting worse.
