Title:

Comments: How can it come to this and why should one be able to decide over another. I hear the argument of noise which if you have been in the backcountry you can't hear anything one ravine over! Why are the cross country skiers acting like we can't get along. I have never seen a cross country skier in the woods when I ride please manage the national forest don't close it down we all have a right to recreate in these areas not just a select few. One great family Activity that people that don't even go to the mountains are trying to take away please stop!
