Comments: First of all I support Map#2 and only this Map . I'm a Snowmobile Repair Business Owner I opened my Business in 1995 to work on Snowmobile's with what your Proposing with other Maps it just nut's , with these other Maps showing almost complete closing of most of the riding areas why would anyone come here to Ride and bring there family for that experience of the High Country in our Forest is to Snowmobile there, with all the 3rd party studies done over the passed few years , by Yellowstone Nat. Park, Snowmobile Manufacture's and etc. they haven't found any harmful thing about snowmobiling even in these HIGH traffic areas. Not sure way these Groups and the Forest Manager's think that it's fair to dicress our already small 15% of the Sierra Nevada Mountain's to ride in when everyone else has 85% to what they wish to do there ? Again why are you listen to these HIGHLY Political, Big Money back Groups and Listen to your public about using and the need to have Public Lands available to ALL Forest user's ???
