Title:

Comments: I fully support responsible equal opportunity use of our surrounding backcountry areas. I am fortunate to have had the opportunities to see things that most don't get the chance to. My life is largely focused on the outdoors and wilderness and enjoy it as much as anyone. My family and I use snowmobiles and dirt bikes to access remote areas and are always respectful of the wildlife, habitats and ecosystems present. By closing off the proposed areas for wilderness you are taking away access to PUBLIC grounds that contain many trails and areas that thousands of responsible outdoor enthusiasts enjoy and use. I personally work to conserve habitats for wildlife and advocate against the shrinkage of their lands and habitats but find it incredibly hypocritical that people and those supporting this plan don't see the danger in shrinking down the human habitats. We cannot all be confined into small spaces because someone else has a different view of how this land should be used. We live to be connected to nature and taking that away is absolutely wrong. I fully oppose these plans to increase these designated wilderness areas. Everyone should have access to these lands to be able to responsibly enjoy them as they see fit.

Thank you,

Jillian Horkan
