Comments: I'm a big believer in shared, responsible use while in the backcountry. I'm a big part of of the motorized community. I'm an avid snowmobiler, OHV user, Jeepster, etc. I also spend a bunch of time hiking, mountain biking, camping etc. After reviewing the proposed wilderness area and the effect it would have on the motorized community, I'm highly opposed to the proposal. There's enough wilderness area already. No matter what recreational use you believe in, everyone should have equal responsible access to our public lands. Thank you for your time and consideration.
