Comments: I support not closing any areas for over the snow vehicle use. The areas I enjoy with my family and friends include all the areas that are open for use currently. I believe closing down areas would have a negative impact on many different levels. Also the boundaries on proposed maps will be very difficult to navigate in the snow on a map , just because there is no distinct boundary like we have now. Being a resident of Strawberry, we purchased our house on George's drive so we could access the forest without having to trailer snowmobiles and OHV's . I support all outdoor activities including , skiing , snowshoeing, hiking , horseback riding, OHV riding, OSV riding , mountain biking . I believe that we all have to coexist in the areas that we have open to enjoy. In my 10 years of riding snowmobiles, the only skiers/snowshoers you will see in areas we access by snowmobile are ones who either got a ride out on a snowmobile or have a snowmobile of their own. Closing any areas to OSV use will have a large economic impact on the county , this county is driven by people visiting from other areas throughout the summer and winter months . We all can work together to keep all areas open for all uses .Also snowmobiles have the least impact to the environment of any motor sport activity. Thank you for your time and I hope we can come up with a plan that works for everyone who enjoys the great outdoors
