Comments: There have been many studies done proving that snowmobiling does not harm the vegetation or wildlife in any way. We also do not disrupt the skiers and snow shoers because all the areas we ride are areas that are either inaccessible or to far out for the skiers and snowshoers. If we were not allowed to ride the areas we do we would be forced to ride in the direct areas that are more often used by the skiers and snowshoers defeating the purpose of this map change
