Comments: As an advocate for nature, conservation and the environment, I strongly support expanding Lee Canyon's accessible areas. For multiple reasons. The first being the space allocated for improvements is not not sufficient. The current design is to accommodate a much smaller population than we currently have in Clark County. Lee Canyon is in a unique position to introduce a whole different side of nature to countless people in our community. If there is no where for them to park, eat, or use facilities. Then these people will never have the opportunity to mountain bike, hike, ski, snowboard, camp or learn about the outdoors properly. Thanks to overcrowding or lack of access. It's only fair to give the next generation an opportunity to learn about and hopefully act on behalf areas like this that are beloved by many. I also believe it's worth noting Lee Canyon is taking all the risks, willing to invest millions in infrastructure and creating year round jobs. Lee Canyon / powdr corp. has proven their commitment to the area, ability to manage a sensitive environment and should be rewarded. The people of Las Vegas and surrounding areas deserve to have reasonable access to their own high alpine environment. Luckily there is an operator who is willing and able to provide a sensible plan and management. Hopefully reason and progress will prevail. It's time to bring this area up to the standard of the others in our local community.
