Title:

Comments: There is wildlife and forestry that is unique and only found in certain sections of the mountain and to further add to that the world mind you. You would be destroying a delicate ecosystem. Many people also come to hike and sit just off trail to enjoy the uniqueness that area of the mountain provides. Adding a roller coaster and new lifts will destroy that area and further to disrupt what life still exist in the surrounding area. Please do not let heard and money be put ahead of life and rare life at that. Let the area remain as is. So that people can still enjoy and appreciate what us unique to that side of the mountain and what is found no where else in the world.

A concerned citizen,

Edward Schelling
