Title:

Comments: fracking in the Wayne

To the powers that be:

I oppose fracking in the Wayne due to the many health concerns that have been discovered, including contamination of drinking water supplies, the presence of opportunistic pathological bacteria in fracking-impacted water wells, the increased possibility of unstable ground movement (earthquakes), and increased air pollution and smog. Please see this reference for more elucidation:

Compendium of Scientific, Medical, and Media Findings Demonstrating Risks and Harms of Fracking  
(Unconventional Gas and Oil Extraction) Fifth Edition March 2018

We can do better. Let's explore alternative, safer energy sources.

Thank you.

Jean Brinich
