Comments: No on fracking in the Wayne national forest

Hello. I am concerned about the prospect of companies being allowed to frack for natural gas in the wayne national forest. I think that this is a bad idea and that you should vote against it. Our state should be investing in clean renewable energy and not passing laws that allow us to extract more fossil fuels from the ground. It s a well known fact that fossil fuels significantly contribute to global climate change and we need to do all that we can to stop and reverse that. This country has already expierenced more mega storms in the past decade than we have in history and it is only going to keep getting worse if we do not make major efforts to move away from fossil fuels.
