Comments: Well here we go again with taking the only roads people who are too old hurt or disabled to hike in the woods. I'm always amazed at how much money there is to remove roads and restore the habitat but no money to run a grader or dozer. Weyerhaeuser already made it hard enough on us with families by charging to hunt the king's deer on their land now you want to take more access from us. I guess this is what happens when all these committees consist of non hunting non fishing and single people maybe a few professional guides too. We that have kids can't run through the woods for miles or take weeks off for scouting. We work and raise families. keep the roads open even if only to walk in
