Comments: Hello, I would like comment on the County Line Project #52653. I do not believe the public notice and other publicly available information provides sufficient detail about the precise location of the project activities, as well as the timing and duration of the project. Some of the activities will help to disperse recreation and reduce conflicts between different types of uses. I encourage those actions but believe the notice and other information needs to describe the actions in more detail. Most importantly, I am very concerned about extending logging actions into the winter recreation and Christmas Tree cutting season. A few years back, a logging operation up 4-Mile Road extended into winter and the logging truck traffic was a serious safety concern both on FR300 and 4-Mile Road itself. Please prohibit logging truck traffic after the Thanksgiving time-frame, or at least strictly control and publicly notice the timing of truck traffic so that the public can avoid dangerous logging trucks on snow packed and icy roads. Thank you. Peter Fleming
