Comments: Looking over the maps and with number five being the preferred alternative I have a few concerns. Firstly the backside of hearing creek from the Heli airport is a great area to drop down into Eagle Meadow Road. Not only is it Fuel savings but it is a great ride to connect the two areas together. Also in Eagle having Eagle Meadow and long valley connected is a great area To ride. Also noticed Long Valley has been stripped and is very slim and skinny and long. We need Long Valley to connect not only to Eagle Meadow but also all the way over east bound to Haypress lake. Also on the map I see that The top of the pass is very small in size and has calendar restrictions. I'm opposed to that. At the end of the year when the highway is opened up many friends go up there in late May or June and barbecue and hang out with family members and play at that site . Not only is it a great place to see your friends one last time before the snow is gone but also a great area to have the young ones learn how to ride in the big Meadows there next to the highway.
