Comments: I've heard numerous times over the years that there is a small Corredor that was going to be opened up or the thought of it has been talked about in the back of Clarks Fork that was going to connect over to Highlands lake on highway four. I don't know much about it but I'm hoping that you do and maybe that could even be a possibility to connect the both highways. If that was opened and groomed that could be a great venture for the day. Hopefully your old records show these ideas and might be able to make it a reality.
