Comments: I support Alternative D, with its recommendation of 97% wilderness for the Nellie Juan-College Fjord Wilderness Study Area. I also ask that the management plan be strengthened to protect and monitor the wilderness characteristics of the Wilderness Study Area. I lived in Anchorage for 30 years and routinely enjoyed the portion of the Chugach NF that was accessible from the road system. It should be managed as a recreational forest, first and foremost -- no salvage logging, no new mining claims, etc. The Forest Service should also be studying the long-term effects of the Exxon Valdez oil spill on the terrestrial resources of the forest.
