Comments: As a member of the Sierra Nevada Alliance, I am uniquely positioned to hear what the community is concerned about. In this case, the greater Tahoe region has experienced a double digit percentage in visitors over a 10 year period. Specifically, the more remote areas of the wilderness have become overrun with noise pollution and erosion. Right now, a lot of the concern is around traffic and the environmental impact. However, we must start to pay attention to the overuse and wildlife disruption that is occurring in the name of hunting and sport. Please limit and in some circumstances prohibit the use of OSVs. Thanks.
