Comments: Please do not allow OHV access to wilderness areas, especially the Carson Iceberg Wilderness and Mokelumne Wilderness areas. Threatened species have few great places of refuge, let alone humans seeking a reprieve from noise, motors and the modern world. Let's maintain these wilderness areas and their function as places of rebirth and refuge for both humans and wildlife.

I understand the need for compromise and OHV usage, but let's direct that usage to areas currently permitted for motorized vehicles.

Thanks,

Steve
