Comments: My wife and I own a cabin on private property on the Eagle Meadow Road 5NO1 between Haypress and Relief Reservoir since the late 1960's. For many years, I have also worked in the Sierra National Forest as a volunteer reporting to the Forest Service maintaining the trails and cleaning the campgrounds, building bridges, clearing and chainsawing trees off of the roads and trails, and working with my team of volunteers in order to make the forest a clean and safe place for the public.

I was shocked to learn that after all of my years of service to the Forest Service, the Stanislaus Preferred Alternative Plan 5 would eliminate my access to my cabin on our private property where our family has ridden snowmobiles for many many years.

It is important to continue to allow snowmobilers access to their private properties where we have had access for decades of snowmobile use.

Please leave the area between Long Valley, the northern boundary of Emigrant Wilderness, Relief Reservoir to Kennedy Meadows and Haypress open to snowmobile use for many snowmobile riders as in many many years past.
