Comments: I find it a little difficult to fully understand all of the implications of this proposed project, but I did want to express my desire to see the preservation of as much flexibility for recreational snowmobile use as possible, in as many areas as possible. I recognize the need to support multiple uses, but there are very few places that allow snowmobile usage and my family loves to come to this area specifically because of the unique availability of both on- and off- trail snowmobiling. Please do not take any steps that would reduce the amount of recreational snowmobiling area. Thanks.
