Comments: To whom it may concern!

The hwy 108 and Hwy 4 snowmobile areas have been a significant part of the California snowmobile culture and economy for decades! You need to keep all current areas open for over snow usage! No need to close or change anything! Your plans to do so not only effect the tax & fee paying Americans who love to recreate in these areas, you effect there free will and there ability to enjoy the outdoors! You will also effect the economies of all of the foothill and mountain towns! Snowmobiliers, cabin owners, back country skiers and boarders all go to these area to ride and have for years! If you close these areas down, they will not go up the hill anymore, they will not stop and buy gas in strawberry, they will not rent cabins in Arnold, they will not buy snowmobile registrations, or snow park passes! Cabin owners will not go up so the service business's in the mountain towns will fail! You are not just effecting a few snowmobiliers! You are effecting American citizens ability to live, proposer, and enjoy themselves! The government of this country should never take actions that effect so many people negatively! Especially when the opposition is fueled by the elite environmentalists agenda !!
