Comments: My family has enjoyed almost 50 years of taking in and enjoying the beautiful area where our cabin is located about 2 miles south of Haypress Lake on Eagle Meadows Road.

Our best family memories are snowmobiling this area. We have always gone out on rides to East Flange Rock, Relief Reservoir and some of the ridges between these areas to take in the views of the mountains and look into wilderness area.

The current plan makes sense. All of the existing riding areas follow close to private property and access roads. Snowmobiles are the perfect OHV because we leave no trace! My family and our snowmobile community take pride in protecting and preserving our open riding areas for generations to come.

The plans proposed limit access even to our private land and shut down areas that we have enjoyed for years and are passing on to our children. Please leave wilderness wilderness and Near natural can be preserved by the stewards of the Sierra, us, the snowmobilers community.

I hope you will leave the Stanislaus National Forest "Land of Great Use" not "Land Of Limited Use"!

Please take note of my consideration.

Thanks! Proud Eagle Meadows land owner

Casey Clarke
